 1 Session Only - Monday, May 14, 6-9pm
 Mission Best Western - 32281 Lougheed Hwy

• Be Informed...this knowledge could save or improve your life! • Question & Answer Period to follow

DO YOU KNOW? LYME Disease...

- is rapidly increasing in North America with pandemic potential.
- was virtually unknown in Canada until the 80's.
- is caused by bites of Deer Ticks common in BC.
- is easily identified by appearance of the bite.
- is quite difficult to diagnose later as it disguises as numerous major ailments like depression, chronic fatigue syndrome, fibromyalgia, and a variety of psychosomatic disorders.
- responds to treatment far better when diagnosed early.
- is severely under-diagnosed and under-treated by Canadian healthcare.
- is extremely debilitating to one's overall health if left untreated...ruining people's lives needlessly.

DISCOVER the TRUTH about LYME

at Dr. Murakami's **FREE** Community Lyme Forum

YOU WILL LEARN...

- how best to protect yourself from Tick bites.
- to recognize the tell tale signs of the bite.
- to safely remove a tick burrowing into your flesh.
